

To whom it may concern,  
I choose to be a consumer of XM Radio's services. I pay for this service and use it continuously on a daily basis. One valuable component to this service is the immediate availability of traffic and weather information.

I choose to pay for this service because the quality and variety are not available from "Broadcast Radio". I urge you to see NAB's petition 04-160 for what it really is, a troubled industries attempt to limit a competitors service offering.

Reject NAB petition 04-160.
